Batman alarm clock. Lego batman clock instructions. Lego batman alarm clock. Lego batman alarm clock instructions.

Here's a paraphrased version of the provided text: **Full Instruction Listings for LEGO Sets** This section offers comprehensive instructions for various LEGO sets, including Batman and DC Comics Super Heroes. Users can find these guides helpful in building their favorite LEGO creations. **Features and Tools** The following tools and features are available to aid users in their LEGO-building endeavors: * Building Instructions * MOCs (My Own Creations) finder * Alternate Builds * Top Designers showcase * Competitions and Raffles * Workbench Sets * Part Colors database **LEGO Alarm Clock Instructions** Congratulations on purchasing the LEGO Alarm Clock! To get started, users need to remove the item from its packaging using a Philips/Cross head screwdriver. The clock operates on 3 AA batteries, which must be used as specified by the manufacturer. **Clock Radio Components and Functions** The LEGO Alarm Clock features various components and functions, including: * Snooze/Light function * Date display * Time/Year setting * Days of the Week display * Alarm On/Off button * Time Set and Alarm Set buttons * Up and Down navigation buttons To activate your LEGO Alarm Clock, place 3 AA batteries in the battery compartment located on the back panel. Once installed, press the "TIME SET" button to enter time setting mode. Press and hold the button until the display shows flashing "12H" or "24H" hour modes. Use the UP and DOWN buttons to select 12 or 24 hour mode, with default being 12 hour mode. Press and hold the TIME SET button again, then use the UP and DOWN buttons to set the correct hour and minute. To fast forward or backward when setting time, press the UP or DOWN button for one second. To set the date, complete the three steps to set the time first. Press the TIME SET button again, and use the UP and DOWN buttons to set the YEAR in the same location as the time on the LCD screen. Next, press down the TIME SET and UP and DOWN buttons to set the MONTH in the upper left hand corner of the Alarm Clock. Then, continue by setting the DATE by pressing down the TIME SET and UP and DOWN buttons. The DAY OF THE WEEK will automatically set and display on the LCD screen when all time and date settings are complete. Finally, press the TIME SET button to return to normal time display. Leaving the unit for 30 seconds will automatically return to the correct time and date display. To set an alarm minute, press the UP and DOWN buttons until the correct time is displayed. Press the ALARM SET button one more time to complete the setting and return to normal display. Alarm time defaults to 12:00 if not set. Time mode (12/24 hours) affects alarm visibility. Turn alarm on/off using the ALARM ON/OFF button. Bell icon indicates alarm status. Press ALARM ON/OFF again to turn off. When an alarm goes off: - Power saving mode automatically turns off after 1 minute inactivity. - SNOOZE button snoozes for 5 minutes, then resets alarm time for next day. - Pressing any button turns off current alarm and keeps set alarm for next day. - SNOOZE/LIGHT button activates backlight for 5 seconds.
